

# What is Still Dynamics doing to keep you safe?

## PRE-SCREENING

We will ask that all patients fill out a COVID-19 survey the day of their appointment. All of our staff will also be required to fill this survey prior to each shift.

## Medical Grade Germicidal UVC LAMPS

All treatment rooms will be equipped with UVC germicidal lamps that are used to kill 99%-100% of all bacteria and viruses on all surfaces and staff clothing between patients.

## PERSONAL PROTECTIVE EQUIPMENT (PPE)

We will kindly ask that all patients wear PPE when entering the clinic. To help ensure everyone's safety, it will be mandatory for all staff to be wearing PPE as well.

## GLASS SHIELDS

Protective plexiglass shields have been installed throughout our customer service areas. To help minimize contact, please note that we will only be accepting debit or credit cards - all of our terminals have tap payment capabilities.

## HAND SANITIZER STATIONS

We have created hand sanitizing stations throughout the clinic. You will be asked to sanitize your hands before and after each treatment session, and upon entering and exiting.

## FREQUENT CLEANING

Still Dynamics will increase the frequency of cleaning around the entire clinic. Only certified cleaning products will be used to ensure the utmost safety of our patients.

## LIMIT THE NUMBER OF PEOPLE

We kindly ask that only the person receiving treatment enter the clinic. Our patients that are minors or require physical assistance will be allowed to bring an accompanying person.
